

Azarshid Pars Refractories Co.

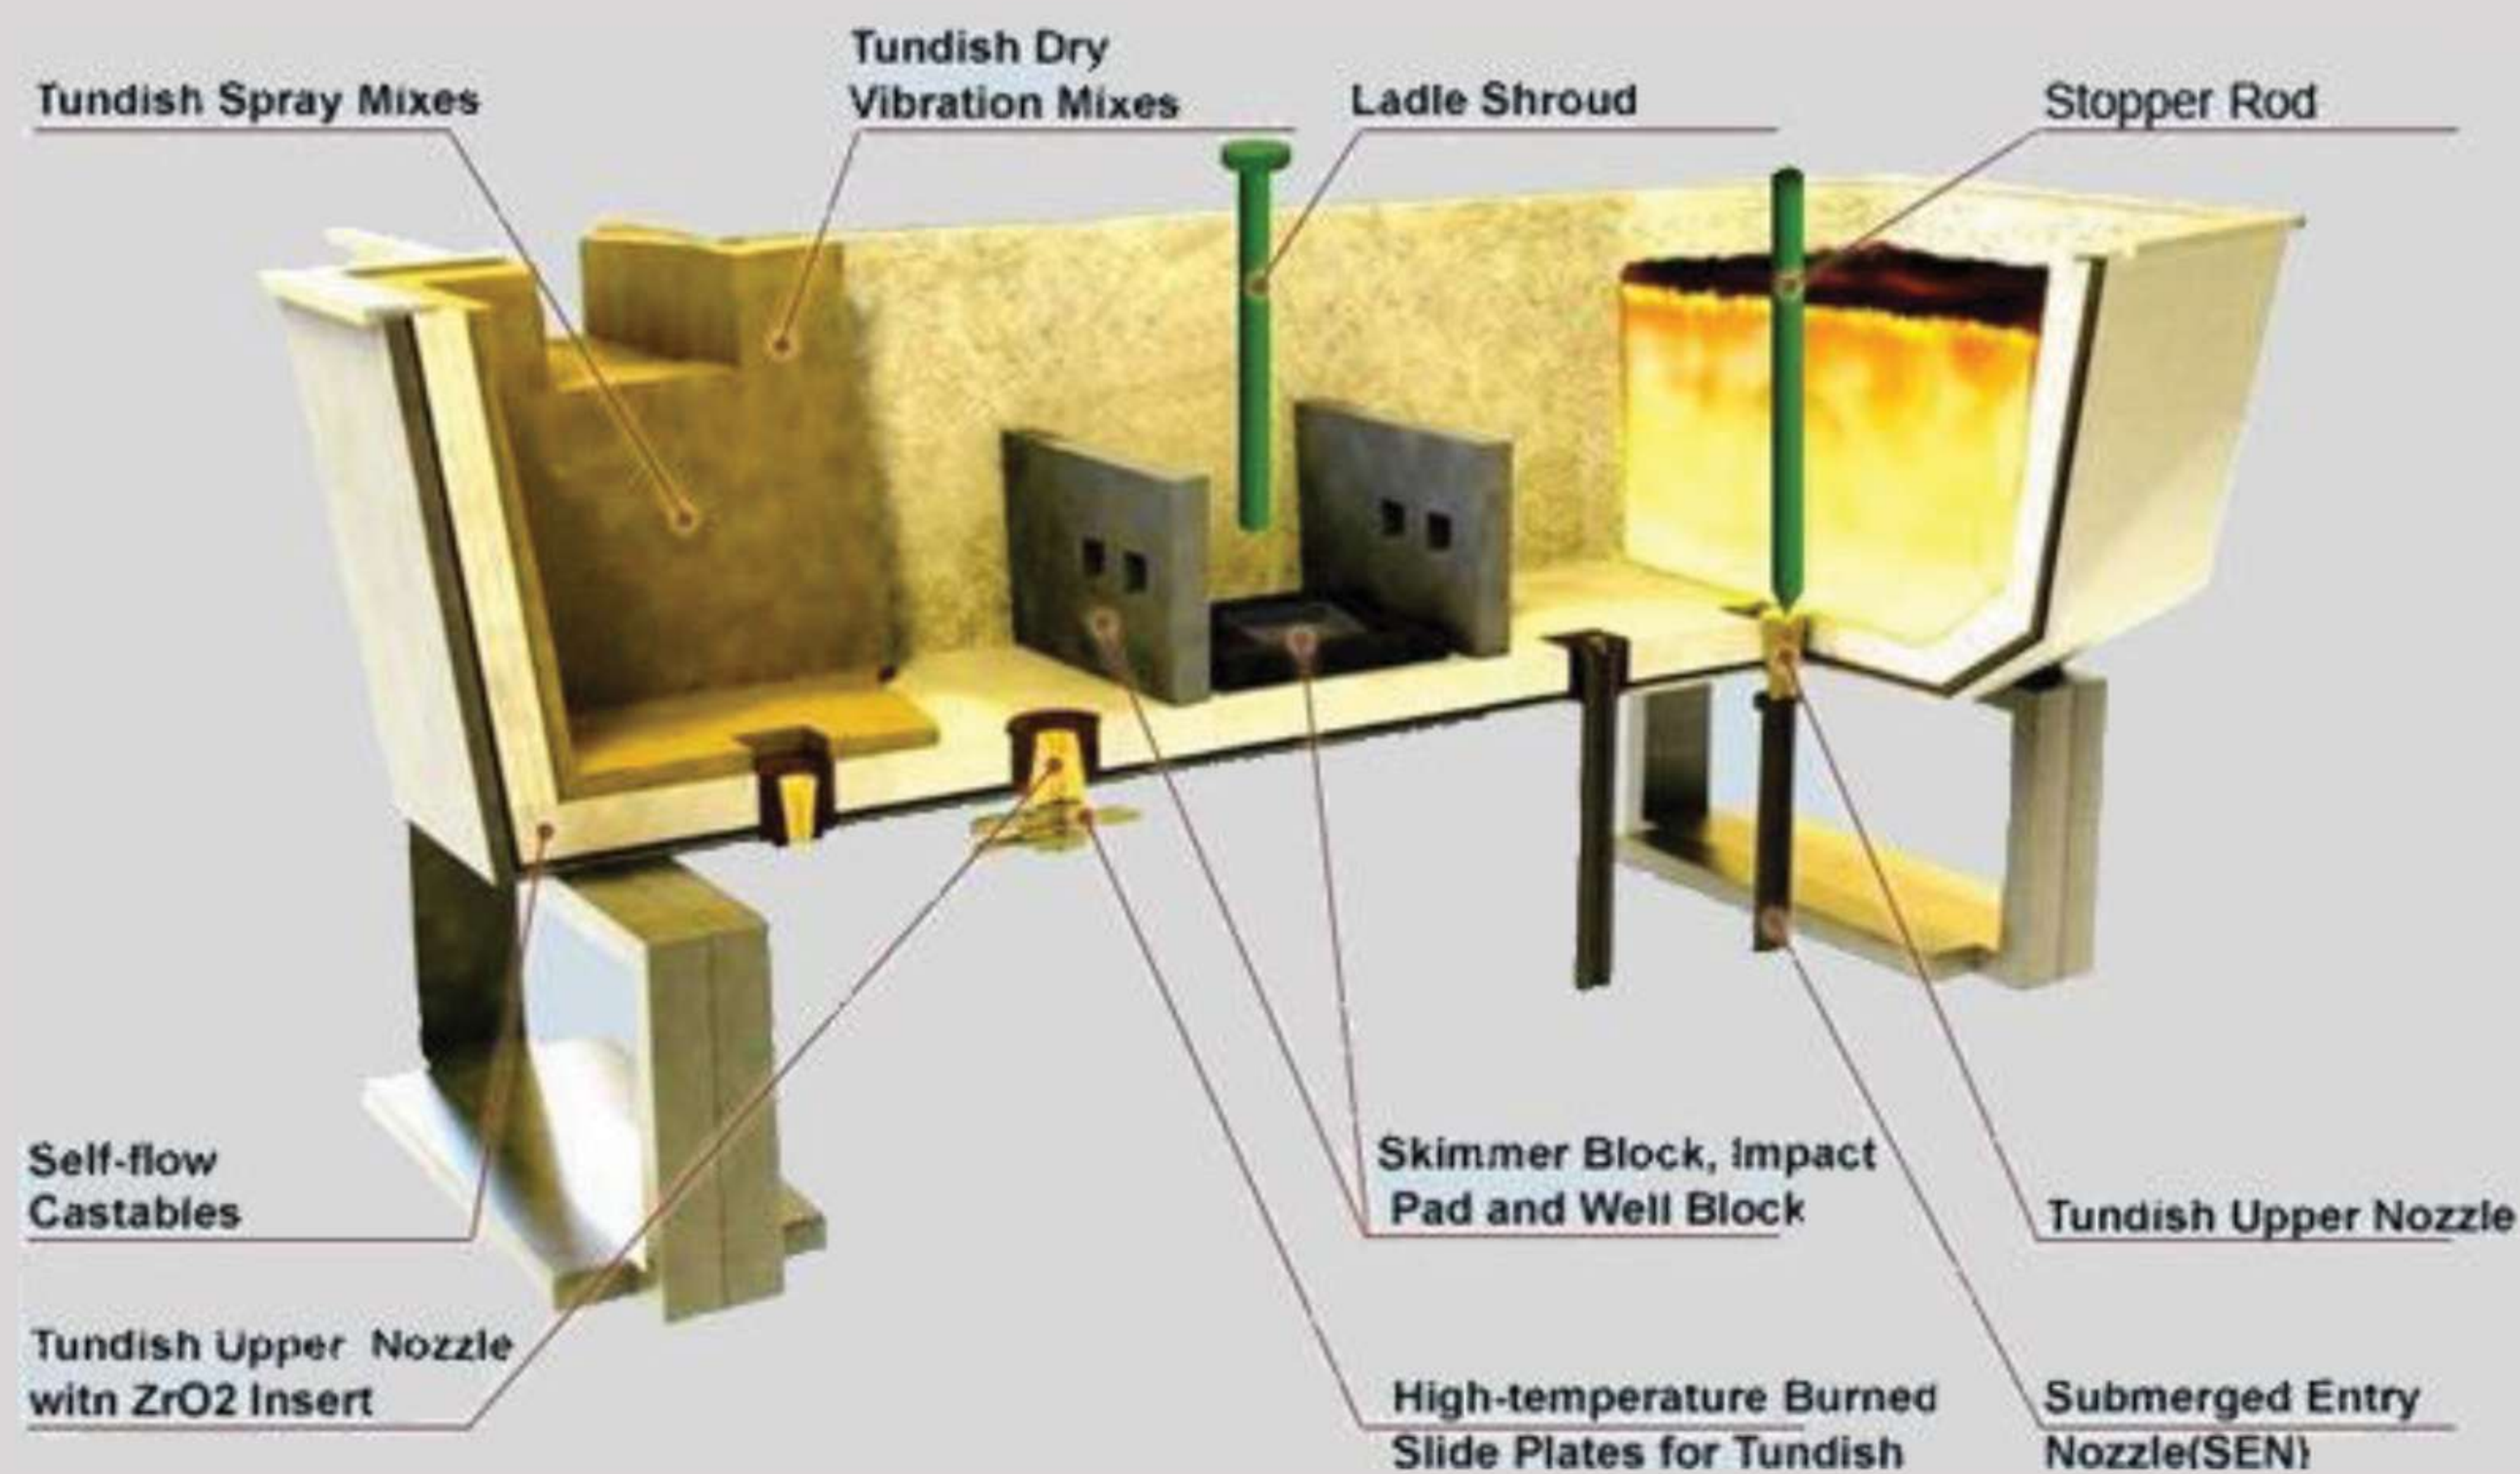

MAGNESIA MASSES FOR EAF

Name of products	General Information
EAF cold Ramming SHIDRAM 95C	Cold repair mix Sintered magnesia – ceramic bond 1750°C
EAF hot Ramming SHIDRAM 88H	Hot repair mix - Sintered magnesia Ceramic bond - 1750 °C
Cold & hot Repair Gunning Mix SHIDGUN 85S	Gunning mix - Sintered magnesia Silicate bond - 1750 °C
Dry Ramming Mix SHIDMIX 95S	Ramming and Taphole repair mix Sintered magnesia - Sulphate bond - 1750 °C
Back Fillinf Mix SHIDFILL 80	Back filling mix - Sintered magnesia – Ceramic bond - 1650 °C

MAGNESIA MASSES FOR CCM

Name of products	General Information
Tundish Dry Mix SHIDTUN 80CH	Cold setting mix - Olivine, Sintered Magnesia – Chemical bond - 1750 °C
Tundish Wet Mix SHIDCOAT 90H	Slurry gunning mix - Sintered magnesia - Chemical bond - 1750 °C
Magnesia casting mass SHIDMIX 90S	Ramming and Taphole repair mix Sintered magnesia - Sulphate bond 1750 °C

Pre-Cast Refractories for Melt Shop

Name of products	General Information
Tundish Well Block	Bauxite & Andalusite Ceramic bond - 1750 °C
Ladle Well Block	Alumina Spinel - Ceramic bond 1800 °C
Tundish Turbo Stop	Alumina Spinel - Ceramic bond 1800 °C

About Us

ISO

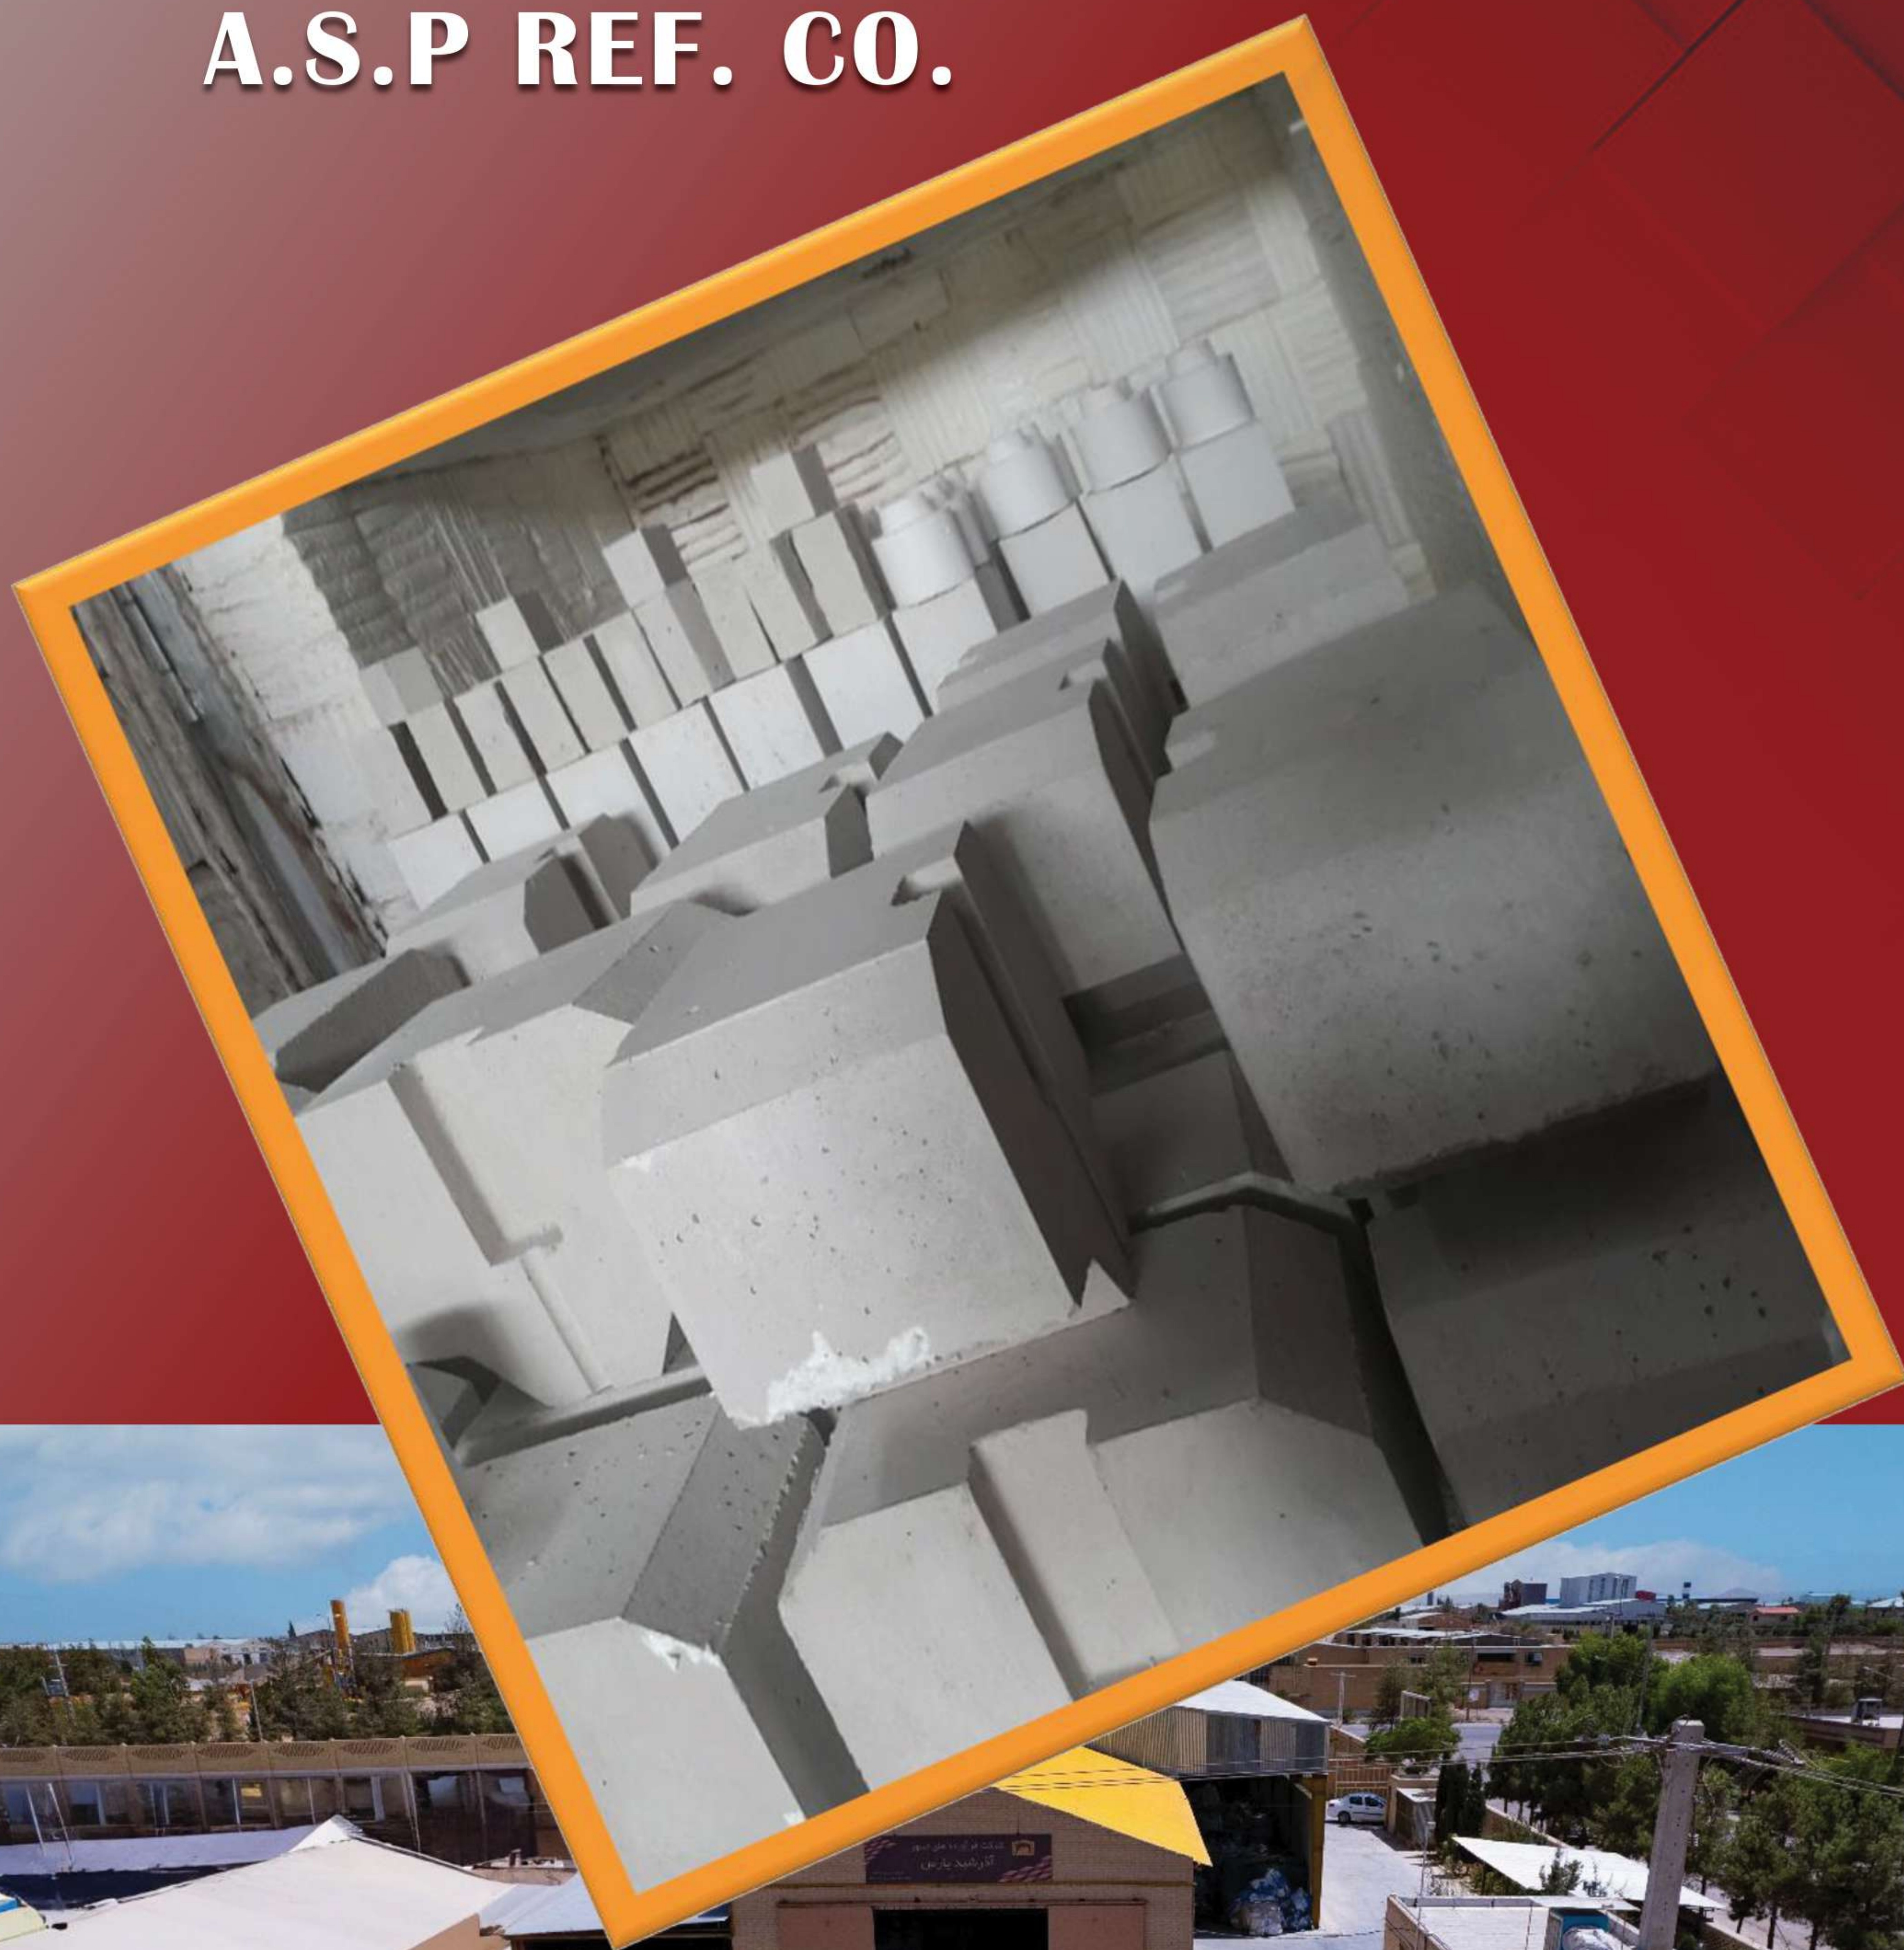

The team of shareholders and executives of Azarshid Pars Refractories CO., drawing upon their valuable experience and background in the country's refractories industry and with hopes for the growth of refractory-consuming industries such as steel, cement, copper, oil, and petrochemicals, officially commenced operations on August 2014 ,30 (1393/6/8 in the Iranian calendar). The company began producing various types of refractories products with an annual capacity of 140,000 tons in two phases, covering an area of approximately 10,000 square meters.

Currently, the complex includes two production units:

- 1- Mass & refractories pre-cast
- 2- Recycling & Processing
